【APSN-TSN CME Symposium 1-2】

Innovation in Education and Training for Nephrology

Dr Kate Robson

Department of Nephrology, Monash Health & Western Health, Melbourne, Australia

GlomCon Fellowship

High-quality education and training is vital to the growth and development of a specialist workforce to advance kidney health in the Asia-Pacific region and across the globe. Nephrologists are increasingly seeking innovative avenues for building and consolidating knowledge, critiquing scientific literature, troubleshooting challenging clinical scenarios, developing leadership and advocacy skills, mentorship and peer networking. Digital learning experiences through social media, podcasts, webinars, virtual journal clubs and online courses broaden access and empower learners from diverse settings. In rapidly-evolving areas of practice such as glomerular diseases, innovative online learning communities (e.g. GlomCon Fellowship) are connecting early-career nephrologists with each other and with global leaders. By understanding, developing and tailoring digital learning opportunities to the needs of our Asia-Pacific region, we can foster a generation of interconnected emerging nephrologists motivated to lead locally and globally.
